

Literary Essay: Grade 5

Writing Unit 2

A Literary Essay
Based on the Book
Baseball Saved Us by Ken Mochizuki

Depending on how you look at it, baseball can be a game of fun, a serious sport, or a way to cope with difficulties in life. The game itself requires cooperation, strategy, and above all, determination. After reading the story, *Baseball Saved Us*, and talking about it with others, it seems that not everyone thinks about the story in the same way. Some people think that the story is about a group of Japanese-Americans who play baseball just to keep busy while they are detained in an internment camp during World War II. They think that the people just want to do something fun because they are bored. But I think the story is much more than that. I think *Baseball Saved Us* is really about how the power of determination can help people overcome huge obstacles in their lives.

Early in the story, there is evidence of the power of determination. For example, the narrator states that the Japanese-Americans didn't have anything they needed for baseball, but they find ways to get what they need. They create the baseball field with shovels and water. They build bleachers out of trees. They sew uniforms out of mattress covers. This shows that, through the power of determination, they are able to experience a part of the everyday life they once enjoyed.

Later in the story, in one of the last games of the year to decide the championship, a young boy nicknamed Shorty shows determination when he is up to bat with two strikes and a runner on second. He wants to prove to himself, the other kids, and the guards that he can play well, even though he usually grounds out. The other players tease him when he is up to bat. He "glanced at the guardhouse behind the left field foul line and saw the man in the tower, leaning on the rail with the blinding sun glinting off his sunglasses. He was always watching, always staring." This suddenly makes Shorty mad. He grips the bat harder and decides that he is going to hit the ball past the guardhouse. And he does! He crosses home plate, and his teammates lift him onto their shoulders in celebration. This shows that Shorty, through the power of determination, is able to prove to himself and to others that he can help his team win.

At the end of the story, when the Japanese-Americans are released from the internment camp and return home, Shorty shows determination during the first game of the season. Everything is not much better at home as he hopes it might be. Shorty is getting teased again because he is the only Japanese-American on the team. He "looked at the pitcher. The sun glinted off his glasses as he stood on the mound, like the guard in the tower." Shorty desperately wants to show his teammates that he is not the enemy. He "swung and felt that solid whack again." In the end, Shorty's power of determination helps him win the game for his team.

Literary Essay: Grade 5

Writing Unit 2

Now, as I think about the power of determination, I realize that much of what we can accomplish in life is because of how strongly we feel on the inside. When we dig down deep and will ourselves to accomplish our goals, we are far more successful than if we rely solely on our physical ability. In my life, I have found that determination is the key to getting good grades in school, doing well in sports, and reaching other goals. It takes body and mind to accomplish what we want in life. If you dig down deep and find your own reason to be determined, it will make a difference in your life.
